RRIM

LOCATION. The institute's laboratories and offices at the third mile, Ampang Road, Kuala Lumpur are open from 8 am to 1 pm and 2 pm to 4 pm on Mondays to Fridays, and from 8 am to 12.30 pm on Saturdays.

EXPERIMENT STATION AND FACTORY. This station of the RRIM is situated 16 miles from Kuala Lumpur, at Sungei Buloh on the Kuala Lumpur — Kepong — Kuala Selangor road. Visits may be made on Mondays or Wednesdays by arrangement. There is a guest house.

CORRESPONDENCE. All LETTERS must be addressed to the Director, Rubber Research Institute of Malaya, Post Office Box 150, Kuala Lumpur. Special enquiries may be marked for the attention of particular officers. The address for TELEGRAMS is Searching, Kuala Lumpur. TELEPHONE: Kuala Lumpur 72521. PARCELS occasionally arrive without any indication of their origin. Senders' names and addresses should be written clearly on the outside of all packages, and advice of despatch should be given by letter or telegram.

PROHIBITED PLANT SPECIMENS. Attention of planters and others in territories outside Malaya and Singapore is drawn to the Malayan Plant Importation Rules which prohibit the importation into Malaya of any part of a plant, whether living or dead, unless it is accompanied by a permit issued by the Director of Agriculture, Malaya. No permit will be issued in respect of any diseased plant or any plant pest. Any plant imported in contravention of these Rules (whose object is to prevent the introduction of diseases or pests) will be destroyed without examination. Anyone outside Malaya who desires our advice on any matter that may require examination of living material must first enquire by letter.

ADVICE. Enquiries are invited from rubber producers in Malaysia, Brunei and Nigeria who may require more detailed information applicable to their own special problems. Where it is considered necessary, visits will be made to estates in Malaya as convenient. Visits to estates in other territories are by special arrangement. The only visits for which charges are normally made are those of our clone identification inspectors. INTERVIEWS should be arranged by letter, as members of the senior research and advisory staff are frequently absent on visits to plantations.

PUBLICATIONS. Subscription to all or any of our series of publications (*Planters' Bulletin, Journal, Reports,* and miscellaneous booklets) may be made by depositing $15 with us. An annual statement of account will then be submitted. We are unable to give annual subscription rates or any form of discount, but for multiple subscriptions a lower rate of initial deposit is acceptable. Postage is charged on oversea mailings. A list of 'Publications of the RRIM' is available on request.

PLANTERS' BULLETIN

OF THE RUBBER RESEARCH INSTITUTE OF MALAYA

Kuala Lumpur 1964 Main Contents

Planters' Bulletin 70

	Page
Editorial: Plant Diseases and Importation Rules	1
Planting Materials Used on Estates in Malaya, 1962	3
RRIM 600 Series Clones	6
Collar Protectant Dressing Against White Root Disease	8
Warm Blooded Animals	10
Notes: Cockchafers	18
Grasshoppers	20
Patent: Low Temperature Rubbers	20

Planters' Bulletin 71

Editorial: Rational Use of Fertilisers	23
Fertiliser Statistics	24
Identification of Plants on Malayan Rubber Estates: Plates 33-40, Climbing and Scrambling Dicotyledons	29
The Use of Soil and Leaf Analysis in Analysing Fertiliser Requirements	41
'Mineral Deficiencies in *Hevea*'	45
Note: Improved Establishment of Legume Covers	46

Planters' Bulletin 72

Editorial: Comminuted Rubber	47
Some Notes on Green Budding	49
Instructions for Green Budding Rubber Trees	54
Chemical Division Reports	60
Flood Damage	61
Samples for Examination by Chemical Division	63
Notes: Slug Bait Pellets	53
Book Review	68

Planters' Bulletin 73

	Page
Editorial: The Processing of Estate Rubber	69
Air Dried Sheet (Pale Amber Unsmoked Sheet)	71
Boron Toxicity in Rubber	76
Aerial Reconnaissance of Rubber	78
Rhinoceros Beetle, A Warning — Repeated	80
Special Rubbers in 1963	82
Notes: Patents: New SP Rubbers	86
Abnormal Adventitious Rooting of *Hevea brasiliensis*	87
Journal: Volume 18 Part 2	88
Volume 18 Part 3	90

Planters' Bulletin 74 (Planters' Conference Issue)

Conference Review: Processing of Estate Rubber	93
Latex Reception from Assisted Collection and Churn Collection Areas	100
Creamed Latex Concentrate	111
New Tunnel-Type Smokehouses	123
Commercial Preparation of Methyl Methacrylate Graft Rubbers	131
Effect of Tree Lace and Cup Lump Storage Conditions on the Properties of Brown Crepe	144
Sole Crepe	155
Peptorub — an Improved Natural Rubber	176
An Illustration of Work Study Applied to Estate Factories	187
Estate Practice and its Relation to Natural Rubber Specifications	197

Planters' Bulletin 75 (Planters' Conference Issue)

Conference Review: Root Diseases of *Hevea*	207
The Principles of Root Disease Control	210
Mechanical Cultivation and Root Disease	218
Effects of Clearing Methods and Root Disease Incidence	225
Spore Dissemination of Root Disease	233
Root Disease Inspection and Treatment	238
Minor Root Diseases — a Reappraisal	244
Notes: Zinc Phosphide—Coconut Oil Mixture. A Caution	249
Patents	249
